***EXAMINERS AMENDMENT AND REASONS FOR ALLOWANCE***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a personal interview with Mr. Gerald E. Hespos on August 19, 2004.

2. The application has been amended as follows (the amendment is that the reference numerals of claims 1-6 have been deleted).

**\* Claim 1 (Currently Amended):**

A connector comprising:

a housing for receiving at least one terminal fitting;

a retainer engageable with the housing at a first position where the retainer is lightly assembled with the housing to permit the insertion and withdrawal of the terminal fitting and at a second position where the retainer is deeply assembled with the housing to lock the terminal fitting in the housing;

at least one housing rib projecting from an outer surface of the housing for insertion into an accommodating groove in a receptacle of a mating housing; and

at least one retainer rib formed on the retainer and substantially aligned with the housing rib along a connecting direction of the two housings, the retainer rib having a projecting end projecting out beyond the housing rib when the retainer is at the first position while projecting no farther than the housing rib when the retainer is at the second position.

Art Unit: 2833

\* Claim 2 (Currently Amended):

The connector of claim 1, wherein the projecting end of the retainer rib is substantially flush with the housing rib when the retainer is at the second position.

\* Claim 3 (Currently Amended):

The connector of claim 1, wherein the housing comprises at least one auxiliary housing rib on an outer surface thereof different from an outer surface through which the retainer is mounted.

\* Claim 4 (Currently Amended):

The connector of claim 3, wherein the housing rib and the auxiliary housing rib have front ends substantially aligned along the connecting direction.

\* Claim 5 (Currently Amended):

The connector of claim 1, wherein the housing rib is dimensioned to prevent the housing from being fit into the receptacle of the mating housing while forcibly deforming the receptacle.

\* Claim 6 (Currently Amended):

A connector assembly comprising the connector of claim 1 and a mating connector to be connected therewith.

3. Claims 1-6 are allowed.

4. Claims 7-13 are deleted.

Art Unit: 2833

5. The following is an examiner's statement of reason for allowance: None of prior art teach or suggest a connector having a retainer rib substantially aligned with the housing rib along a connecting direction of the two housings, the retainer rib having a projecting end projecting out beyond the housing rib in the first position while projecting no farther than the housing rib when the retainer is at the second position.

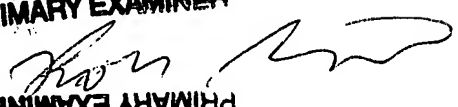

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsuji et al (6692302; 5980332 and 6733346); Konoya et al (US6139375) ; Sakurai et al (US6599154) ; Nankou et al (US6702627) ; Atsumi Keigo (US6036552) are cited to show in the electrical connector having retainer engaging with the housing.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuongchi Nguyen whose telephone number is (571) 272-2012. The examiner can normally be reached on 8:00AM-4:00PM.
